Summary

Full-Stack Java Developer with around 4 years at TCS building scalable enterprise applications using **Java, Spring Boot, Microservices, and Angular**. Proven track record delivering secure, high-performance backend systems for Fortune 500 clients (Verizon, Equitable). Hands-on with **GenAI/RAG pipelines, LLM integration, and cloud-native deployments on GCP**.

Experience

Tata Consultancy Services (TCS)

Aug 2022 – Present

Software Engineer – Java, Spring Boot, Angular

Hyderabad, India

- Developed scalable full-stack enterprise features across insurance (Equitable) and finance (Verizon) platforms using **Java, Spring Boot, Angular, and Microservices**.
- Designed **JWT-secured REST APIs** with RBAC, enforcing 100% compliance in security audits across Equitable's candidate onboarding and multi-level approval workflows.
- Reduced report generation time by **40%** on Verizon's FIAT platform via backend API optimization and business logic refactoring.
- Improved backend response times by **20%** using Java 8 Streams, Lambdas, concurrent processing, and optimized SQL queries.
- Resolved **100+ application vulnerabilities** using Veracode, achieving full security compliance on Equitable's platform.
- Refactored monolithic modules into **independently deployable microservices**, improving scalability and reducing deployment coupling.
- Implemented caching with **Redis** and tuned DB queries to significantly reduce data retrieval latency.
- Set up centralized exception handling and structured logging using **Spring AOP and SLF4J**, reducing MTTR on production issues.

Projects

Mental Health Application | Java, Spring Boot, Angular, Microservices, MongoDB, Ollama, Llama3 | [GitHub](#) | [Demo](#)

- Built a **RAG-powered AI mental health assistant** with contextual retrieval, conversational memory, and LLM-based response generation using Spring Boot microservices and Angular.

JobTrackerPro | Java, Spring Boot, Angular, OAuth2, Docker, Gemini AI, Cloud Run | [GitHub](#) | [Demo](#)

- Developed a cloud-native **AI-powered job tracking platform** using LLM-based email parsing, secure OAuth2 authentication, and webhook-driven automation deployed on GCP Cloud Run.

Random Chat | Java 21, Spring Boot, WebSockets, WebRTC, Virtual Threads | [GitHub](#) | [Demo](#)

- Engineered a **real-time video chat platform** using WebRTC and Spring WebSockets with scalable concurrency powered by Java 21 Virtual Threads.

Collaborative Editor | Java, Spring Boot, WebSockets, Angular, TypeScript, MongoDB | [GitHub](#) | [Demo](#)

- Built a **real-time multi-user collaborative text editor** with Angular frontend and Spring Boot WebSocket backend for live synchronization.

Technical Skills

Languages	Java, TypeScript, Python
Frontend	Angular, HTML, CSS, Bootstrap
Backend	Spring Boot, Spring MVC, Spring Security, Microservices, REST APIs
AI / GenAI	RAG, LangChain, LangGraph, Ollama, Llama3, Gemini AI, Prompt Engineering
Databases	MySQL, MongoDB, Redis
Cloud & DevOps	GCP, Docker, Cloud Run, GitHub Actions
Security	JWT, OAuth2, RBAC, Veracode, API Security
Tools	Git, GitHub, GitLab, Swagger, Postman, JIRA, Agile

Education

St. Ann's College of Engineering and Technology

2018 – 2022

B.Tech in Electronics and Communication Engineering

CGPA: 7.15
