Hari Babu Thatikonda

Full-Stack Java Developer | Spring Boot | Angular | Microservices | GCP

Hyderabad, India · +91-9032805118 · haribabutatikonda3@gmail.com · LinkedIn · GitHub

Summary

Full-Stack Java Developer with 4+ years of experience building scalable microservices, secure REST APIs, and Angular front ends for enterprise clients in finance and insurance, and for Google-internal operations platforms. Proven track record of improving backend performance, hardening application security, and modernizing legacy systems. Hands-on with cloud-native deployment (GCP, Docker, CI/CD) and GenAI integrations.

Experience

Google Operations Center (GOC) *Aug 2025 – Present*

Full Stack Developer Specialist — Software Engineering & Automation *Hyderabad, India*

- Automated **YouTube ads-performance analysis workflows** for **gTech Ads**, replacing manual reporting so teams can show brands how their ads are performing, using **Java, Spring Boot, Python, and TypeScript**.
- Built **Angular dashboards** that turn ads performance data into clear, brand-facing insights, backed by Spring Boot services and API integrations with Google-internal platforms.
- Replaced recurring manual reporting and data-collection tasks with **automated workflows**, freeing global operations teams to spend their time on analysis instead of data gathering.

Tata Consultancy Services (TCS) *Aug 2022 – Aug 2025*

Software Developer — Java, Spring Boot, Angular *Hyderabad, India*

- Designed **JWT-secured REST APIs** with RBAC for Equitable's global insurance onboarding platform, supporting multi-level approval workflows and enterprise security compliance.
- Reduced report generation time by **40%** on Verizon's FIAT finance platform through backend API optimization, SQL improvements, and business logic refactoring for US-based stakeholders.
- Improved backend response times by **20%** utilizing Java Streams, Lambdas, concurrent processing, and optimized SQL queries.
- Resolved **100+ application vulnerabilities** using Veracode and secure coding practices.
- Refactored legacy monolithic modules into **independently deployable microservices**, implementing Redis caching and structured logging via Spring AOP and SLF4J.

Technical Skills

Languages	Java, Python, TypeScript, JavaScript, SQL
Backend	Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices, WebSockets
Frontend	Angular, Angular Signals, HTML5, CSS3, Tailwind CSS, Bootstrap, D3.js
Cloud / DevOps	Google Cloud Platform (GCP), Cloud Run, Pub/Sub, Docker, GitHub Actions, CI/CD
Data / Security	PostgreSQL, MySQL, MongoDB, Redis, JWT, OAuth2, RBAC, Veracode
AI / Tools	Gemini API, RAG workflows, LLM Integration, LangChain, Git, Swagger

Selected Projects

JobTrackerPro | *Java 21 · Spring Boot 3.4 · Angular 17 · PostgreSQL · Gemini · Docker · GCP* | GitHub | Demo

- Built a cloud-native **AI-powered job application platform** that ingests email events, extracts structured data via Gemini LLM, and automates tracking pipelines.
- Implemented **OAuth2/Gmail integration, Google Pub/Sub, Angular Signals, and D3.js dashboards**, deploying the containerized microservices on Google Cloud Run.

CarbonScope | *Java 21 · Spring Boot · Angular · Gemini AI · Climate TRACE · Docker* | GitHub | Demo

- Developed a **carbon emissions analytics platform** integrating global Climate TRACE datasets with Gemini AI to generate sector-level environmental insights through an interactive Angular dashboard.

Random Chat | *Java 21 · Spring Boot · WebSockets · WebRTC · Virtual Threads* | GitHub | Demo

- Engineered a **real-time peer-to-peer video chat platform** utilizing WebRTC for low-latency media exchange and Java 21 Virtual Threads for high-concurrency signaling.

Certifications

Google Cloud Associate Cloud Engineer *(Google Cloud)* · **Azure AI Engineer Associate** *(Microsoft)*

Education

St. Ann's College of Engineering and Technology *2018 – 2022*

B.Tech in Electronics and Communication Engineering CGPA: 7.15
